

CITY OF MANCHESTER
144 McKinley Street
Manchester MN 56007

This Institution is an Equal Opportunity Provider and Employer

August 30, 2024

The City of Manchester is in the process of installing a new water distribution system. This would involve replacing all water mains except for the section that runs down main street. This section was replaced when we did the sewer project in 2009. The new water distribution system will also consist of:

- Replacing 4 fire hydrants
- New curb stops
- New well
- New pump house
- Back-up generator

The city has asked the state to assist with funding of 90% of our project costs. To help pay for the new water system the City has determined that each property that receives City water/or has a water service line shall be charged a monthly water availability charge of \$25.00. This fee will start January 2025. This charge is pursuant to Resolution 2023-04A.
